Professional Experience

Smartly.io

Full-Stack Developer

September 2018 - Present

Developed the text engine for the company's web-based video editor and renderer, which has produced millions of video ads for Fortune 500 customers.

Implemented the video and image management system (Rails, TypeScript) integrated across the company's core offerings, enhancing customers' experience in creating ad campaigns (100% of company revenue).

Owned the company UI component library (React, TypeScript) in close collaboration with product designers.

Interviewed engineering candidates on a survey of front-end, back-end and general technical software skills.

TypeScript JavaScript React Redux Ruby Rails PHP Python Docker

Gofore

Software Developer

February 2018 - September 2018

Founded and led a project to automate the company's internal cloud billing processes, reducing management costs by €1000s per month and improving reliability of billing processes.

Utilized natural language chat bot solutions (DialogFlow) on internal sales data to help developers and designers request relevant projects using technologies of their interests.

Python Flask JavaScript TypeScript Node.js React Redux Angular 2 Express AWS S3 AWS Lambda

Pearson Education

Full-Stack Intern

May 2015 - August 2015

Developed a data visualization tool for over 1000 employees, replacing an expensive OracleSQL tool, while improving the efficiency of the development-testing lifecycle.
